

IONA COLLEGE, RUDIN ACADEMIC RESOURCE CENTER NEW ROCHELLE, NY

Iona College wanted to convert an existing lower level space into a warmer, more welcoming environment for students to come for academic assistance, yet still allow for privacy and personal attention. Alianza proposed the Herman Miller Resolve system for its ability to provide 120 degree layout without the dimensional creep of a panel system. It can also manage electric and data cables as well as carry a personalized branding statement on its screens.

► **IN ADDITION TO THE ARCHITECTURAL IMPROVEMENTS** of new colors, lighting and flooring, the Herman Miller Resolve Stations kept the Center feeling open, and the integrated sound masking keeps all conversations private.

► **THE STACKABLE HERMAN MILLER CAPER CHAIR** provides them with the flexibility to quickly and easily have additional seating within any of the pods.
